iBrickr - Customize your iPhone - by Nate True

File manager

Navigate using the fake iPhone on the right.

| Upload file(s) | Create folder |

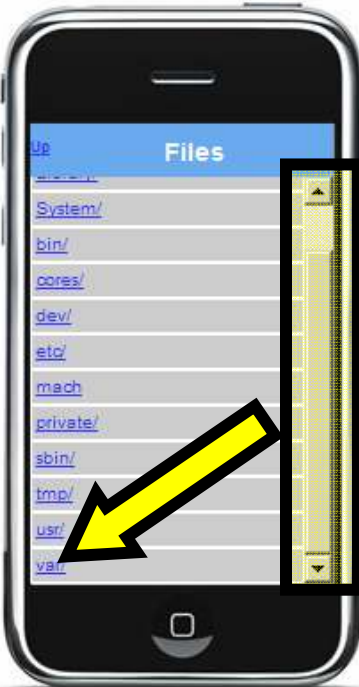

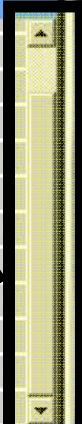

< Back

Up   **Files**

3Deebly/
BlackJainDim/
Classic/
Deesel Adams/
Default/
Diameter/
Hichamzik/
Jordan/
Leopard/
Litho/
Louie Mantia/
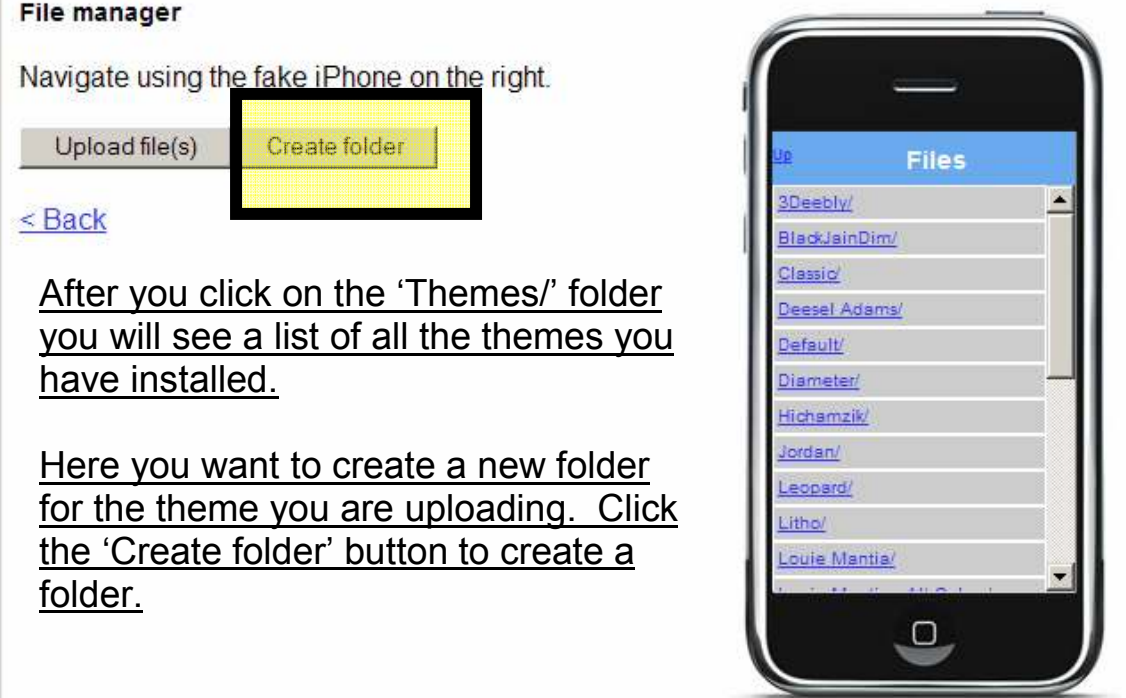

After you click on the 'Themes/' folder you will see a list of all the themes you have installed.

Here you want to create a new folder for the theme you are uploading. Click the 'Create folder' button to create a folder.

---

iBrickr - Customize your iPhone - by Nate True

File manager

Navigate using the fake iPhone on the right.

| Upload file(s) | Create folder |

< Back

Up   **Files**

3Deebly/
BlackJainDim/

Explorer User Prompt

Script Prompt:

Folder name

OK

Cancel

Put the name of your theme here

Leopard/
Litho/
Louie Mantia/

After clicking 'Create folder' you get this prompt. Name your theme here. Don't put the / in your folder name. iBrickr does it for you.

I'm uploading the Transformers theme so I named my folder Transformers. Name yours whatever theme you are uploading. Click OK

iBrickr - Customize your iPhone - by Nate True

File manager

Navigate using the fake iPhone on the right.

| Upload file(s) | Create folder |

< Back

iBrickr will refresh and you should see the folder you just created.

Click on the folder you just created. In my example I created the Transformers folder so that's the one I found in the list and clicked.

---

iBrickr - Customize your iPhone - by Nate True

File manager

Navigate using the fake iPhone on the right.

| Upload file(s) | **Create folder** |

< Back

After clicking on the folder you just created your fake iPhone should look like this.

Here you want to create another folder. Click 'Create folder' once again.

Files

Up

iBrickr - Customize your iPhone - by Nate True

File manager

Navigate using the fake iPhone on the right.

| Upload file(s) | Create folder |

< Back

Explorer User Prompt

Script Prompt:

Folder name

OK

Cancel

Icons

This step is important! When you get the prompt to create this folder, make sure you name it 'Icons' and not 'icons.' This folder is case sensitive. The *I* must be capitalized.

Click OK after naming this folder.
